-  Free-oil Containment and Recovery, Shallow Water
-  Deflection Booming
-  Protected-water Boom
-  Tidal-seal Boom

Geographic Response Strategies for Prince William Sound Subarea

Mineral Creek, NE-16

Center of map at 61° 47.3' N Lat., 146° 24.2' W Lon.

This is not intended for navigational use.

Soundings in fathoms

ID	Location and Description	Response Strategy	Implementation	Response Resources	Staging Area	Site Access	Resources Protected (months)	Special Considerations
NE-16-01 	Mineral Creek Nearshore waters in the general area of: Lat. 61° 07.29 N Lon. 146° 24.39 W	Free-oil Recovery Maximize free-oil recovery in the offshore & nearshore environment of Mineral Creek depending on spill location and trajectory.	Deploy free-oil recovery strike teams upwind and up current of Mineral Creek. Use aerial surveillance to locate incoming slicks.	Deploy multiple free-oil recovery strike teams as required to maximize interception of oil before it impacts sensitive areas.	Valdez	Via marine waters Chart 16707-1	Same as NE-16-02	Vessel master should have local knowledge.
NE-16-01 	Mineral Creek Lat. 61° 07.46 N Lon. 146° 23.85 W	Deflection Deflect oil from Mineral Creek and back into Port Valdez for collection.	Transport equipment to site by marine vessel (class 2/3/4). Deploy boom and anchor system with fishing vessel or skiff (class 3/4/6). Position boom depending on oil trajectory and at adequate angle to deflect oil from Mineral Creek and set up for free-oil recovery. Tend throughout the tide.
